9500 Gilman Drive, La Jolla, CA 92093

Placement Director: Prashant Bharadwaj prbharadwaj@ucsd.edu
Placement Coordinator: Andrew Flores +1 (858) 534-1867 econ-jobmarket@ucsd.edu

Education

University of California, San Diego San Diego, CA
Ph.D. Candidate in Economics *Sep 2021 – Jun 2027 (Expected)*

Cornell University Ithaca, NY
B.A. in Computer Science, Economics (Magna Cum Laude), and Mathematics *Aug 2017 – May 2021*

Fields of Interest

Microeconomic Theory, Behavioral and Experimental Economics

Working Papers

Recognizing Dominance through Local Improvement *(Job Market Paper)*

- *Abstract:* Strategy-proofness is the traditional standard for predictable behavior, yet participants often fail to play dominant strategies. Most existing simplicity concepts attribute these failures to the cost of contingent reasoning, which they lower by comparing the worst case of the dominant strategy with the best case of an alternative. I argue that there is another approach, one that makes more use of the structure of the strategy set, which I formalize as a neighbor relation. Comparing neighboring strategies can reduce the need for contingent reasoning, and, even with a single contingency, it can simplify the search through the strategy set. I introduce a new simplicity criterion: a mechanism is local improvement solvable under a neighbor relation if repeatedly moving to an improving neighbor always reaches a dominant strategy. Strategy-proofness is the criterion under the coarsest relation, and many classical mechanisms satisfy it under finer ones. In extensive-form mechanisms without duplicate dominant strategies, the criterion under one-situation neighbors is strict action-proofness, which is distinct from obvious strategy-proofness. Among local improvement solvable mechanisms that implement the same outcomes, the criterion predicts more dominant-strategy play where the local comparison is salient.

Market Order Mechanisms (with Ben Brooks and Songzi Du)

- If the market order mechanisms satisfy vanishing price impact and vanishing span, they can guarantee competitive outcomes in the large, regardless of information structures and equilibria.

Coarse Revenue Guarantee in First Price Auction and Beyond

- Characterized the worst-case revenue in the first-price auction over all Bayes coarse correlated equilibria.

Work in Progress

Conditional Dominance and Rationalizability with Information-Based Continuation Reasoning (with Joel Watson)

- Draft coming soon!

Strategic Obliviousness (with Emanuel Vespa and Andreas Ziegler)

- Third wave of experiments completed; Analyzing data and preparing for a draft.

Professional / Academic Activities

Academic Presentations

2026: Econometric Society Asian-China Meeting, Southwest Economics Theory Conference, Asian School in Theory, UCLA Student Theory Conference, UCSD TBE Workshop

2025: 36th Stony Brook Game Theory Conference, Caltech Student Theory Conference, UCSD TBE Workshop

2024: EC'24 (poster), 35th Stony Brook Game Theory Conference, GAIMSS'24, UCSD TBE Workshop

Discussions and Service

2026: Program Committee, ACM Conference on Economics and Computation (EC)

2026: Panelist, Virtual Seminars in Economic Theory, on Lea Nagel's talk "Designing Simpler Mechanisms: Transparency and As-If Dominance"

Awards / Fellowships

Clive Granger Research Fellowship, UC San Diego
awarded for the most promising graduate student research — *2025*

Summer Research Fellowship, UC San Diego — *2022, 2023*

Regents Fellowship, UC San Diego — *2021*

Honorable Mention, Mathematical Contest in Modeling (MCM) — *2019*

Top 500, William Lowell Putnam Mathematical Competition — *2018*

Omicron Delta Epsilon (International Economics Honor Society), Cornell University

Dean's List (All semesters), Cornell University — *2017 – 2021*

Teaching Experience

Instructor of Record at UC San Diego

ECON 5: Data Analysis in Social Science — *Fall 2024, Fall 2025*

Teaching Assistant at UC San Diego

ECON 1: Principles of Microeconomics — *Fall 2022, Fall 2023*

ECON 4: Financial Accounting — *Winter 2023, Spring 2024*

ECON 5: Data Analysis in Social Science	*Spring 2025*
ECON 100B: Microeconomics B	*Winter 2024, Winter 2026*
ECON 149: Market Design	*Winter 2024, Winter 2025*
ECON 173B: Corporate Finance	*Spring 2023*

SKILLS / OTHER INFO

- **Programming:** Python, STATA, MATLAB, R, LaTeX
- **Languages:** Mandarin Chinese (native), English (proficient)
